

CLASS II ROAD BASE SPECIFICATION SHEET

Meets California SB1383 compliant

CONSISTENCY

Blend of $\frac{3}{4}$ " crushed rock down to fine dust, engineered for high compaction. Particle gradation ensures interlock and load distribution. Available in recycled formats (concrete/asphalt blend).

CLEANLINESS

Screened and processed to remove oversized debris, organic matter, and contaminants. Recycled versions may contain trace fines or concrete dust but meet safety standards for landscape and construction use.

FUNCTIONALITY

Used as a base layer for roads, driveways, sidewalks, artificial turf, and paver installs. Highly compactable and stable under load. Supports drainage while minimizing shifting or rutting.

VISUAL APPEAL

Neutral gray to tan tones, depending on source. Not decorative, but blends well under turf, pavers, or DG. Surface finish is rough and utilitarian.
