

PLASTER SAND

SPECIFICATION SHEET

CONSISTENCY

Fine-grain, washed and screened silica sand with particle sizes typically under $\frac{1}{8}$ ". Uniform texture ensures smooth mixing and finish in plaster, stucco, and mortar applications.

CLEANLINESS

Thoroughly washed to remove silt, clay, and organic matter. Free from contaminants, salts, or reactive minerals that could affect bonding or curing.

FUNCTIONALITY

Provides excellent workability, adhesion, and surface smoothness. Also used in gardening and paver underlayment.

VISUAL APPEAL

Typically light tan to beige, with a soft matte finish when mixed. Not decorative, but blends well in masonry and hardscape contexts.
