SUPREME WALK-ON SPECIFICATION SHEET

CONSISTENCY

Shredded bark, screened to ½"-2" particle size. Fibrous texture interlocks naturally, creating a cushioned, walkable surface that mats down over time for stability.

CLEANLINESS

Low dust and debris, free from trash, contaminants, or invasive organics.

Bark is stripped, shredded, and screened for uniformity and purity.

FUNCTIONALITY

Ideal for pathways, play areas, hillsides, and high-wind zones. Provides natural weed suppression, erosion control, and moisture retention. Mats down to form a semi-permanent surface that resists displacement.

VISUAL APPEAL

Reddish brown to golden tan tones, with a natural forest-floor aesthetic. Adds warmth and texture to native landscapes, woodland gardens, and rustic installs.
