$\frac{3}{4}$ WASHED GRAVEL SPECIFICATION SHEET

CONSISTENCY

This gravel is a uniform $\frac{3}{4}$ " size with minimal variation, ensuring predictable coverage and compaction. Its angular shape promotes strong interlock, making it ideal for structural and decorative applications.

CLEANLINESS

Each batch is washed to eliminate dust, clay, and organic debris, resulting in a clean, installation-ready product. The low fines content reduces mess and prevents clogging in drainage systems.

FUNCTIONALITY

It offers excellent drainage and load-bearing performance, making it suitable for driveways, French drains, and patio bases. The angular texture enhances stability when used with geotextile fabric or edging systems.

VISUAL APPEAL

The dark gray tone delivers a bold, modern aesthetic that complements both natural and urban landscapes. Its matte finish with subtle mineral sparkle adds visual depth without overpowering surrounding elements.
