## 3/4 CALI GOLD

### SPECIFICATION SHEET

#### CONSISTENCY

Crushed granite rock to 3/4" size, with angular particles for interlocking stability. Particle size is consistent for clean compaction and decorative layering.

#### CLEANLINESS

Washed and screened to remove fines, dust, and organic debris. Free from clay, trash, or reactive minerals. Minimal upkeep required compared to finer aggregates.

#### FUNCTIONALITY

Excellent for dryscape, pathways, driveways, garden beds, and erosion control. Promotes water drainage, reduces runoff, and resists displacement under foot traffic. Can be used as a ground cover or in decorative rock features.

#### VISUAL APPEAL

Warm blend of gold, tan, and rust tones, with a sun-kissed shimmer that enhances desert, Mediterranean, and drought-tolerant landscapes. Natural variation in color adds depth and richness to hardscape designs.
